

1. Do not take your **Glucophage** (Metformin) alone or in combination with other diabetic medications for 48 hours after the procedure. Other drugs containing Metformin are: **Avandamet** (Avandia), **Glucavance** (Glucotrol & Glyburide) and **Janumet** (Januvia).
2. It is very important to drink plenty of water the rest of the day to flush out the contrast.
3. Contact your physician's office to set up an appointment to have your renal function tested and about restarting your medication.

If you have any questions, please contact your primary care physician or the Radiology department at Community Hospital at (970) 256-6440.
